INFANTS**

SURVEYS

Surveys are completed throughout the study from enrollment to 18-months after your baby is born

- All participants are co-enrolled in the Citizen Science COVID-19 study (covid19.eurekaplatform.org)
- Longer surveys are filled out at enrollment, once during each trimester, and at 6-8 weeks (take 30-45 minutes)
- Information about infant health and development collected at 6-months, 12-months and 18-months after birth

OUR MISSION AT HOPE

Healthy Outcomes of Pregnancy for Everyone
Through Science, Partnership and Equity

The HOPE COVID-19 study is nested in the HOPE Research Consortium. Please visit HOPE.UCSF.edu to learn more

SHARE YOUR EXPERIENCES

Throughout the survey you will be asked open ended questions that ask you to share your experiences in detail

COMPENSATION

Participants in some geographies are able to request compensation

- Participants who live in certain counties in California can request compensation at \$25/survey (up to \$175 during the study)
- All participants receive newsletters and may be invited to participate in other studies
